

### **Cauliflower field day celebration at IARI, Regional Station, Katrain**

Cauliflower field day was organized at ICAR-IARI, Regional Station, Katrain on 22-02-2017 to show-case the available technologies in snowball cauliflower to increase the income of the farmers. At this occasion special emphasis was given to popularize the newly developed cauliflower hybrid, Pusa Snowball Hybrid-1 for its cultivation at farmers field. Besides, improved cultural practices and off-season cultivation technologies of cauliflower were discussed with the farmers. The developed breeding materials including cytoplasmic male sterile (CMS) and doubled haploid (DHs) lines were kept for exhibition for their potential use in cauliflower hybrid breeding programme. Representatives from different private vegetable seed companies and around 40 local farmers had participated in this occasion.
