

Demonstration of IARI released varieties among farmers at Bagpath district of Uttar Pradesh

The ICAR- Indian Agricultural Research Institute (IARI), New Delhi has been actively working to address challenges of quality seed demand of our farming community. For that purpose IARI released improved high yielding wheat varieties which are resistant to different types of rust. The following varieties are demonstrated on 3rd November, 2025 at Lachoura and Fakharpur village of Bagpath district of Western Uttar Pradesh. The details of demonstration given below:

Sl.No.	Crop	Variety	No. of farmers
1	Wheat	HD 3386	7
2	Mustard	Pusa mustard 30, Pusa vijay	5
3	Seasonal vegetables (Tomato, Spinach, Radish,Pea,Onion, Carrot,Methi, Coriander,Turnip)	Pusa rohini, Pusa Bharti, Pusa Chetki, Pusa Pragati, Pusa Madhabi, Pusa rudhira, Pusa Kasuri, Pus audit, Pusa seti)	10

The demonstration was conducted by Division of Agricultural Extension under the in-house project 'Agricultural Extension for Nutrition and Health: Strategies and Model'. Dr. Sukanya Barua, Scientist (Sr. scale) and Mr. Satyaprakash were present in farmers' field for technical guidance regarding Rabi crops. The whole programme was done under guidance of Dr. Satyapriya, Head, Division of Agricultural Extension.

Glimpses of farmer scientist interaction
