Asstt. Admn .Officer (FHT)

ANNEXURE

Leaf Area Meter with accessories specifications

Detailed Specifications:

- Resolution: Lower resolution of ≤ 2.0 mm² and higher resolution of ≤ 1.0 mm² with single lens (adjustable with switch/push button) so that there is no need to change optics for different resolutions or with any other better and convenient option.
- Display and display capacity: Data to be displayed on LED panel (up to two decimal points).
- Sample dimensions: Should be suitable for variety of plant samples of variable width, length and thickness.
- Conveyor belt based working: (i) Quiet/silent working of belt system with roller to flatten curled leaves for accurate measurements. (ii) Belt should be clear, durable and suitable for long-term and continuous use. (iii) For rapid sampling higher speed of conveyer belt is desirable. The system should not involve steps of selecting or recording the displayed image of each leaf/sample material and then making analysis or area measurements (individual or cumulative).
- Plate form size for the operation of conveyor belt: Width of ≥ 20 cm is desirable. The size of the plate form (length and width) need to be mentioned. This is required to judge the suitability of the instrument for variety of plant samples of variable width, length and thickness.
- Accuracy: High accuracy and repeatability. Document need to be attached so justify the accuracy range of the instrument for different sample area (size) under different resolutions.
- Calibration: Instrument need to be supplied with Kit (known surface areas) for its calibration (with adjustment knob) from time to time.
- Facilities: Instrument should have facilities like auto zero at any point of time, individual leaf area measurement and cumulative display of leaf area measurement for continuous sampling.
- Light source: Suitable light source, fitted within (in-built).
- Power requirements: Suitable for Indian power supply.
- Working environment: Suitable for Indian conditions/climatic conditions.
- Supplied instrument should be ready to use. Therefore, fitted or supplied with all the required accessories/attachments and options for future up-gradation.
- Instrument should be provided with dust cover, instruction manual etc.
- A comprehensive warranty for at least one year should be provided.
- Authorized agent/supplier certificate from the Principal is required (in case the instrument is being supplied by supplier other than the Principal itself).
- Any additional or meritorious features can be highlighted by the supplier.

Other conditions (to be fulfilled by Principal and/or the authorized agent/supplier):

1. Should provide onsite demonstration and training to the users.
2. Should provide Original Technical Literature of the instrument with detailed drawings, accuracy table or chart, pictures etc. This is essentially required to confirm the technical specifications.
3. Supplier need to submit the specification compliance in a comparative way for their product and its features with the specification as asked in a tabulated and point wise manner. In case this is not being provided, the quotation/tender will not be considered.
