Cultivation, harvesting and processing of Spirulina biomass for value-added product formulation

Spirulina biomass cultivation is a revolutionary development in the field of agriculture. It is high in nutrients with antioxidant and anti-inflammatory properties that makes it great for all usage. This training program focuses on equipping entrepreneurs, students and farmers on various aspects of Spirulina cultivation, methods of harvesting and drying and value additions. The training components will be covered with lectures, practicals and Spirulina cultivation site visits in the NCR Region.

Date: 10 - 12 April 2023

Time: 9:00 AM - 5:00 PM

Venue: CCUBGA & Division of Microbiology, ICAR-IARI, New Delhi

Deadline: 9 April 2023
