About the Division

The Division of Agricultural Extension came into being in 1960. Since then, it has been playing a pioneering role in the growth and development of extension science with specific reference to research, education and training in extension education. The Division has been providing the national leadership role in areas of teaching, research, training and transfer of technology in the discipline of agricultural extension. The Division initiated integration of Entrepreneurship with Agriculture, way back in 1995 and started the first PG course on Entrepreneurship in Agriculture at IARI, which was later followed by other SAUs.

About MANAGE

MANAGE was established in 1987, and is a pioneering and innovative agricultural management institute. It is aimed at training and advisory in agricultural extension in reference to a rapidly growing and diverse agriculture sector. Effective ways of managing the extension system are needed and extension organizations need to be enabled to transform the existing set up through professional guidance and training of critical manpower. MANAGE is aimed to fulfil this imperative need. MANAGE offers its services in Management Training, Consultancy, Management Education, Research and Information Services.

National Institute of Agricultural Extension Management (MANAGE),
Hyderabad, Telangana- 500030

About the course

Agripreneurship refers to entrepreneurship in agriculture. Entrepreneurship is a concept that encompasses transforming an idea or vision into a “new business or new venture creation, or the expansion of an existing business, by an individual, a team of individuals, or an established business”.

An agripreneur is an entrepreneur whose business is agriculture or agriculture related. A successful agripreneur needs to understand consistency, creative thinking, smart working, risk taking, communication, and finding market opportunities.

The training is aimed to develop competencies for agripreneurship. The sessions are such designed to focus on the process of entrepreneurship development, building the communication and inter-personal skills, creativity, problem solving, calculated risk taking, achievement motivation, efficient utilization of the available resources, formulation of business plan, implementation of the prepared blue print at the ground level, the intricacies of how to initiate and manage an enterprise.

Target group

Extension professionals, who need to be exposed to the latest technologies, innovations and the best management practices, so as to guide the grassroots farmers effectively at field level.

Objectives

- ❑ To impart entrepreneurial skills and equip participants with knowledge in enterprise creation and facilitation in agriculture and allied enterprises
- ❑ To create a set of master trainers to train, guide and motivate the youth in agripreneurship

Methodology

The training programme includes sessions on various potential enterprises, like Integrated Farming system, Horticulture and cereal based processing, Protected cultivation, Mushroom cultivation, Apiculture, Floriculture, Vermi-composting, Community based seed production, Sericulture, etc. Appropriate methods from the following will be selected based on the content.

- Blend of theories, case analysis, experiential learning, simulation exercises, and small group discussions
- A mix of methods including presentations and discussions led by experts, case discussions and field experiences
- Sessions will be thoroughly interspersed with theory and virtual demonstration of the enterprise activities in practice
